General Information

About SCM10

The National Kidney Foundation 2010 Spring Clinical Meetings (SCM10) presents a unique opportunity for busy renal health care providers to learn new developments related to all aspects of nephrology. It is designed for kidney doctors in the private sector and academia, fellows and residents with a special interest in kidney disease, general internists, pharmacists, physician assistants, nurse practitioners, nurses and technicians, social workers, and renal and clinical dietitians.

An important objective of SCM10 is to present the latest insights into chronic kidney disease care. Participants will learn about new and evolving concepts related to kidney disease through a carefully designed combination of interesting courses, practical workshops, thought-provoking symposia and insightful debates incorporating the latest developments in clinical nephrology.
